PROFILE

Full-Stack Development graduate from Code Institute 2021. I am highly organised and have experience of bringing projects from inception to completion in several fields such as video editing, photography and music. These industries require split second decisions in high pressure environments, decisive communication, a cool-head and attention to detail. I have strong communication skills in a multinational environment, am a passionate creator and empathetic leader. I am ready to take the next step in my life and bring all of these qualities to my career in tech.

EDUCATION

CODE INSTITUTE (ONLINE)

Diploma in Software Development

2020 - 2021 (1 year)

Graduated from Code Institute, with a diploma in Software Development through an intense Coding Bootcamp created and validated by tech industry experts and academics (Europe's only university credit-rated online coding Bootcamp - EQF & RQF, Level 5). Tech covered: HTML, CSS (incl. Bootstrap, Materialize), JavaScript, (incl. jQuery, JSON) Python, SQL & MongoDB, GitHub, Heroku, and Full-Stack Frameworks with Flask & Django. After graduation I continued to study React and Node.js through Udemy.

TAFE ARMIDALE, NSW, AUSTRALIA

Diploma in Screen (Distinction)

2004 - 2005 (2 years)

During this 2 year course I completed a number of commercial and private projects that I directed, produced and/or edited. At the end-of-year awards ceremony I won Best Director and a number of my projects were nominated for an award. I received highest marks upon completion and 3 months later landed a job as a video editor in the news room at the Australian Broadcasting Corporation (ABC) in Sydney. Course subjects covered include direction, video editing, cinematography and sound design.
